REMARKS

Figs. 8A and 8B have been corrected. Claims 1 and 3 have been amended. Claims 1-3 remain pending. Reconsideration and reexamination of the application, as amended, are requested.

The Examiner objected to Figs. 8A and 8B because they did not include the legend "Prior Art". These Figures have been corrected.

The Examiner objected to claim 1 because of a grammar informality. The grammatical error has been corrected.

The Examiner rejected claim 1 under 35 USC §102(b) as being anticipated by Lake. Claim 1 has been amended to require a connecting member attaching said wiper arm to said lever portion. Lake discloses an arm 5 which has a right angle bend with portions extending orthogonally from the right angle. Applicant assumes that the Examiner is identifying one leg portion of arm 5 to function like a lever portion and the other leg portion of arm 5 to function like the wiper arm of the system of claim 1. Lake does not disclose a connecting member attaching the wiper arm to the lever portion as required by Claim 1 in the present application. Consequently, Lake cannot anticipate Claim 1.

The Examiner indicated Claims 2 and 3 to be allowable.

In view of the above, it is submitted that the application is in condition for allowance. Reconsideration and reexamination are requested. Allowance of Claims 1-3 at an early date is solicited.

Respectfully Submitted,
